Subject: AMMI reclamation - phonecall documentation (S/019/035)

I received a phone call from Mr. Lyn Kimball on 11/09/01 who called to forward information on the status of the required reclamation work being performed at the Dolores Placer mine. He stated that Dale and Frank Snyder had been out to the mine last weekend to perform the required reclamation. They were planning on returning this weekend to continue their work.

A serious industrial (electrical) accident occurred to Frank (Dale's brother) this week, while they were working on a project near Bluffdale, Utah. Frank is now in the hospital with very serious electrical burns which have resulted in partial loss of his limbs.

Because of this accident, the reclamation work will not occur this weekend as planned. Lyn will send us a letter early next week confirming these unfortunate circumstances and seek some leniency from us on extending the deadline to complete the required reclamation work.
